memo

To: All Field Offices From: Oklahoma City  
Re: [REDACTED] 02/13/2006

Details:

[REDACTED] Joel Henry Hinrichs III, pursuant to Attorney General Guidelines [REDACTED] Hinrichs exploded an Improvised Explosive Device (IED) in a public area, thereby causing his death.

Subject Assessment

Hinrichs was investigated [REDACTED] for numerous reasons: Hinrichs' death was caused by an IED that exploded near a crowd of over 80,000 people; thus, his act may have been an attempt at a suicide bombing. The explosives Hinrichs used in this act [REDACTED]

[REDACTED] An official photograph of Hinrichs obtained early in the investigation shows Hinrichs with a beard.

Subject Classification

This case is being closed due to the investigation not finding any [REDACTED] for Hinrichs [REDACTED] [REDACTED] for Hinrichs' actions, and [REDACTED] [REDACTED] in the bombing that occurred.

Case Summary

On October 1, 2005, at approximately 7:30 p.m. CST, witnesses reported hearing an explosion in the vicinity of the University of Oklahoma (OU), Memorial Gaylord Stadium in Norman, Oklahoma. The explosion occurred 100 yards outside of the west side of the stadium. At the time of the explosion, the OU football team was in the second quarter of a game against Kansas State University and about 84,000 people were in the stadium.

INITIAL RESPONSE AND INVESTIGATION

When law enforcement responded to the scene of the explosion, an eyewitness, [REDACTED] told agents he was walking north on Van Vleet Oval at the time of the explosion. [REDACTED] said he saw an individual appearing to be "hunched" over on a park bench, leaning over what appeared to be a backpack in his lap. The individual on the park bench appeared to be wearing clothing in layers and a baseball cap. As [REDACTED] continued to walk past a charter bus, he heard a loud explosion that "rocked" him forward. [REDACTED] looked towards the park bench where the sound of the explosion appeared to come from and saw a cloud of gray smoke as well as a human arm. The color of the arm appeared to be that of a Caucasian individual. [REDACTED] looked towards the park bench where the sound of the explosion had come from and

To: All Field Offices From: Oklahoma City  
Re: [REDACTED] 02/13/2006

b7E

saw what appeared to be the bottom half of the man that had been sitting on the bench. [REDACTED] indicated he did not see any other individuals in the area.

b6  
b7C

Oklahoma City Division's (OCD) Special Agent Bomb Technician (SABT) searched the scene and found partial remains of a Caucasian male as well as components associated with an improvised explosive or IED, to include electrical wiring. The SABT also observed that the deceased individual exhibited signs of blast damage, consistent with damage sustained by individuals killed or injured by IEDs.

The OCD Evidence Response Team (ERT) responded to the scene and a preliminary search was conducted. ERT agents observed a severely damaged deceased individual seated at a wooden park bench. Agents believed the damage to the body appeared to be consistent with injuries caused by a blast or explosion. The following items were found in the area of the park bench: a day planner, which contained a number of names, dates of birth, email addressees and other information, and a wallet containing an Oklahoma drivers license, OU student identification card, Social Security card, credit card, U.S. currency, and a number of business cards and similar documents. The wallet was located on the person of the deceased individual. The Oklahoma drivers license in the wallet was in the name of Joel Henry Hinrichs, III, date of birth February 2, 1984, address [REDACTED] Norman, OK. The Social Security card showed the name Joel H. Hinrichs, III. The student identification card was in the name of Joel Henry Hinrichs.

b6  
b7C

ERT reported a black backpack was located on the ground next to the deceased individual. The backpack was X-rayed by agents who determined the backpack appeared to contain some type of meter device and hand tools. The backpack was shot with a disrupter (water).

Agents also located a chemistry book, a crescent wrench, and some black nylon material that appeared to be the remnants of a backpack. ERT also collected [REDACTED]

b7F

To: All Field Offices From: Oklahoma City  
Re: [redacted] 02/13/2006

b7E

b7F

[redacted]  
[redacted] Finally, a two-page letter about  
"selective service" was found near where the explosion occurred.

At approximately 1:00 AM on October 2, 2005, the OCD  
ICON team was mobilized and a command post was subsequently  
initiated at the OCD office. Numerous FBIHQ representatives were  
deployed to assist OCD (to include CART, Explosives Unit, [redacted]  
and Fly Team).

b7E

In the early morning hours of October 2, 2005, agents  
arrived at the address listed on the Oklahoma drivers license,  
[redacted] At the residence,  
agents contacted [redacted] who indicated he was  
[redacted] of Hinrichs. [redacted] stated Hinrichs was  
a member of the [redacted] Fraternity. [redacted] stated Hinrichs  
was known to "like explosives." He also indicated Hinrichs kept  
the majority of his explosive-making equipment in the trunk of  
his vehicle. [redacted] said Hinrichs' vehicle was a blue Lincoln  
Town car (agents determined a blue Lincoln Town car, OK tag VUL  
014, was registered to Hinrichs). [redacted] also stated that  
Hinrichs would drive out to remote areas to try to detonate  
bombs. [redacted] told agents Hinrichs had moved out due to rent  
problems and that he was unaware of Hinrichs' current address.

b6  
b7C

An OU Department of Public Safety Detective advised  
agents that OU records indicate Hinrichs was registered as an OU  
student (Mechanical Engineering major). The records also  
indicate that Hinrichs' address is listed as [redacted]  
Norman, Oklahoma, as of August 23, 2005. An individual by the  
name of [redacted] is identified in the records as  
Hinrichs [redacted]

b6  
b7C

[redacted] is described as a white male, date of birth  
[redacted] place of birth [redacted] Social

b6  
b7C

A check of [redacted]

b6  
b7C  
b7E

At approximately 3:30 AM on October 2, 2005, agents arrived at the residence of [redacted] Norman, Oklahoma. Agents described the residence as a multi-unit apartment building. Agents observed a blue Lincoln Town car, Oklahoma tag number VUL 014, parked in the parking lot of the apartment building. While at the location, agents observed an individual leave [redacted] and enter the apartment next door, [redacted]. A short time later, a person who appeared to be the same individual left [redacted] at which time he was contacted by agents. The individual identified himself to agents as [redacted] and agreed to be interviewed.

b6  
b7C

[redacted] advised the agents that Hinrichs was [redacted] and that [redacted] lived in [redacted]. He advised the agents that he had [redacted] since approximately [redacted] indicated that in approximately [redacted] on the Internet. He advised Hinrichs responded and moved into [redacted] approximately June 6, 2005. [redacted] told agents that Hinrichs was quiet and kept to himself. He advised that he and Hinrichs did not socialize. He also stated [redacted] was a two bedroom apartment and [redacted] and Hinrichs each had their own rooms and shared the common areas. He indicated no other person lived at [redacted] other than [redacted] and Hinrichs. [redacted] told the agents he was aware that Hinrichs had a laptop computer. [redacted] indicated he had no knowledge of explosives and was unaware of any activities by Hinrichs in that regard. [redacted] signed a written waiver consenting to a search of the residence. [redacted] also provided a description to agents of the interior of [redacted]

b6  
b7C

To: All Field Offices From: Oklahoma City  
Re: [REDACTED] 02/13/2006

b7E

the apartment and described which of the rooms had been occupied by Hinrichs.

At approximately 4:30 AM on October 2, 2005, OCD's SABT entered the residence of [REDACTED] and observed the room believed to have been occupied by Hinrichs. A number of items that appeared to be associated with the possession and manufacture of improvised explosives (firecrackers dipped in Triacetone Triperoxide (TATP), burned hobby fuse, and matches) were observed. Also observed were a number of mixing bowls, a Crock Pot-type slow cooker, a thermometer, and a number of other plastic containers. One of the containers contained a popsicle-type stick with a white powder residue. The SABT observed that each of the items appeared to be "non-sparking," a characteristic necessary to manufacture and handle explosive material. The SABT observed a number of the containers to have varying quantities of white-colored powder from residue to larger amounts. The SABT also reported he detected a strong odor of a chemical that he associated with peroxide or a similar chemical, which he further described would be consistent with a location where peroxide-based explosives were located or manufactured. The SABT indicated that his observations at the scene suggested the explosion was consistent with a high explosive, and that his observations at the apartment were consistent with the manufacture or preparation of a high explosive. After discovering the materials, agents withdrew from the residence and secured the area. The building was cleared of all residents and placed under surveillance.

b6  
b7C

Along with obtaining consent from [REDACTED] to search the common areas (as well as [REDACTED] laptop) of apartment [REDACTED], agents obtained a search warrant to specifically search Hinrichs' room and laptop computer in [REDACTED]. Agents obtained consent to search apartment [REDACTED] (and the residents' laptop and desktop computers) from its residents. Bomb technicians and ERT arrived at the scene of the searches at 7:00 PM on October 2, 2005.

b6  
b7C

Apartment [REDACTED] was cleared by SABTs at 12:01 AM on October 3, 2005, and ERT began processing the scene. Bomb technicians initiated the search of [REDACTED] at 12:10 AM, followed by ERT at 12:40 AM. Searches of both apartments concluded at 3:08 AM on October 3, 2005.

SABTs found significant varieties of precursors along with approximately 0.4 pounds of TATP explosives at Hinrichs' residence (the TATP explosives were later destroyed at a local range).

To: All Field Offices From: Oklahoma City  
Re: [REDACTED] 02/13/2006

b7E

Hinrichs' laptop was located during the search and discovered to be on and in screen-saver mode. A CART examiner on the search team moved the mouse to end the screen-saver mode and was able to view the screen. A text document was open on the screen. The text document contains a class schedule, homework due, and other miscellaneous items. In the middle of the text document is the line, "Fuck all this. None of you are worth living with. You can all kiss my ass." Of interest, the cursor was at the end of this line (which could indicate this was the last input).

At the morgue, FBIHQ/Explosives Unit determined that approximately one to two kilos of TATP were the cause of Hinrichs' death.

#### IN-DEPTH INVESTIGATION

Writer and co-case agent SA [REDACTED] organized the case by splitting investigators into seven separate teams. An SSA/SA/TFO was the team leader for each team. The following teams were responsible for one aspect of the investigation, allowing the case agents to manage the case more efficiently: INTERVIEWS, CART, EMAIL, EVIDENCE, FIG, SOG, and LEGAL PROCESSES.

b6  
b7C

#### INTERVIEWS

Approximately 200 interviews were completed in this investigation. Significant interviews are summarized below.

Within the first 24 hours, all of Hinrichs' immediate family members throughout the US were provided death notifications and interviewed. All painted a picture of a lonely, depressed individual [REDACTED]

[REDACTED] All describe Hinrichs' fascination with explosives since age 7 or 8, characterize him as religiously neutral (Christian), and feel he is more conservative than liberal. [REDACTED] stated [REDACTED]

b6  
b7C

Numerous interviews of [REDACTED] fraternity members (many of which were listed in Hinrichs' day planner) were conducted within hours of the incident. Hinrichs was described by these individuals as lonely, weird, depressed, and someone who was having academic problems at OU. Most believe if he was a bomber, it was as an accident rather than terrorism. Several stated he was fascinated with guns and explosives, and one initially stated Hinrichs spent one (1) or two (2) days last week at the frat house as he "gassed his apartment" with chemicals and the vapors were too strong to withstand (this initial statement was subsequently corrected by the individual interviewed -

[REDACTED] and [REDACTED] at OU's Memorial Stadium on the night of the explosion. They saw Hinrichs' photograph on the October 2, 2005, evening news and claimed they saw Hinrichs get turned away from the stadium's Gate 6. When interviewed on October 3, neither individual could provide descriptive data on the individual they saw at Gate 6.

b6  
b7C

[REDACTED] Ellison's Feed and Seed in Norman, Oklahoma, was interviewed on October 3 regarding Hinrichs' attempted purchase of ammonium nitrate fertilizer days before the explosion. [REDACTED] stated that on September 28, 2005, a white male entered the store and inquired about purchasing ammonium nitrate fertilizer. The white male wanted "3600" (36%) and was not interested in synthetic "4600" (which is not used in explosives). [REDACTED] identified a photograph of Hinrichs as being the white male who made the inquiry (an OCD agent canvassed other fertilizer stores in the Norman area but no stores recognized Hinrichs as having purchased or attempted to purchase fertilizer).

b6  
b7C

On October 3, 2005 [REDACTED]

[REDACTED] was interviewed regarding contact and emails she had received from Hinrichs. She met him at a meeting of Society of Women Engineers (SWE) held on September 13, 2005. [REDACTED] discussed with Hinrichs the possibility of him participating in the SWE "Hamburger Feed" event on October 1, 2005. On September 14, 2005, she then received an email from Hinrichs that read, "I guess if you want me to I could volunteer for the hamburger feed, although I need to get the food handler's permit for it. Of course, that's only if you really want me there; I might be a bit oversensitive, but I kind of got the vibe that I wasn't very welcome, like when you turned your back directly toward me to talk to some other people. If you don't like me, please say something so I can stop wasting your and my

time. It really hurts to be me and see a lot of backs. That being said, I hope I'm wrong (and sorry if I am). I was really surprised to see that a girl as attractive as you is single, or dating or whatever :) I never figured out how to ask a girl out or what I'd take her out to do, but if you can help me figure out how that works, maybe I could buy you dinner or something :) Anyway, since my picture doesn't show my face, I was the tall guy who fumbled around and tried to help out a bit at the SWE info session. -Joe." On September 18, 2005, [REDACTED] received another email from Hinrichs that read, "Have you checked facebook yet? I sent you a message volunteering to help out with the 10/1 hamburger fee(d), but never heard back. I need to know whether you'll need me or not soon so I can make plans for that weekend. -Joe."

b6

[REDACTED] Hinrichs prior to Hinrichs' death.

b6  
b7C  
b7D

From interviews it was determined that there was a National Merit Scholar presentation immediately prior to the game at the stadium on October 1, 2005. Hinrichs was a National Merit Scholar and poor grades caused Hinrichs to lose part of his scholarship money for the fall semester of 2005.

A neighborhood canvass was conducted in the vicinity of Hinrichs' residence. The information obtained from neighbors supports earlier descriptions of Hinrichs as a loner.

The OU Athletic Department indicated that Hinrichs did not purchase OU football season tickets or a single game ticket from the OU Athletic Department, but there is no way to know if Hinrichs purchased a scalped ticket or bought a ticket at a game-day booth. OU Athletic Department records do not show that Hinrichs ever purchased any athletic ticket while at OU.

Numerous leads were set to locate and interview individuals with whom Hinrichs [REDACTED]

[REDACTED] was located in Norman, Oklahoma, and interviewed regarding [REDACTED] Hinrichs. She met Hinrichs through the fraternity house approximately one year ago. She did not start talking to him regularly until the end of the summer of 2005. She never went to Hinrichs apartment but shared quite a lot of emails and in-person conversations at the fraternity house. [REDACTED] was confident that Hinrichs was a non-denominational Christian and there was "absolutely nothing Islamic" about him. Although they had just started to become friends, [REDACTED] thought she might have been as close to Hinrichs as anyone. Hinrichs did not have many friends and was not a social person. [REDACTED] was not aware of anyone who helped Hinrichs make the bomb which killed him, nor was she aware of anyone who had knowledge that he had made the bomb. She was not aware of any bomb-making group or any terrorist group or affiliates nor of anyone else thinking of committing suicide. She described Hinrichs mental state as depressed in general, but not aggressive toward others. [REDACTED] stated Hinrichs was smart and if he had wanted to hurt others with a bomb, he would have been successful. Hinrichs told [REDACTED] he found ammunition and explosives interesting and then added, "Not that I would ever use them for anything.")

On October 5, 2005, OU voluntarily provided OCD with the contents of Hinrichs' OU email account, hinrichs@ou.edu. A review of email traffic from Hinrichs' OU email account indicates Hinrichs contacted [REDACTED] on September 22, 2005. The email reads as follows, "I'm not doing so well. I seem to be getting worse and worse. I actually asked a girl out for the first time last week, but she said she was already dating someone. I missed my classes today and didn't finish or turn in a lab that was worth 1/9th of the grade in one of them. I missed the career fair, so I don't even have a way of getting a job next summer, much like I can't seem to get around to getting a job now. So I feel really bad."

b7E

EVIDENCE

All physical evidence collected during the previous searches was reviewed. [REDACTED]

b7E

Receipts recovered at Hinrichs' residence indicate one gallon of acetone was purchased from WalMart on September 26, 2005, and one gallon of acid from ACE Hardware on September 27, 2005, by Hinrichs. Receipts also indicate the purchase of gloves, funnels, and drain cleaner. Hinrichs made these purchases with his debit/credit card. [REDACTED]

b7E

[REDACTED] One transaction from WalMart was self-check out and the cashier from the other WalMart transaction was interviewed but had no recollection of Hinrichs. The cashier from ACE Hardware was interviewed and remembered Hinrichs and that he was alone but was not acting in a suspicious manner.

Video surveillance footage covering OU's Memorial Stadium [REDACTED] was retrieved and review for Hinrichs was completed on October 4, 2005, with negative results. The stadium [REDACTED] OCD

b7E

[REDACTED] obtained video footage from [REDACTED] the stadium. Review of these tapes were negative for Hinrichs.

Video surveillance footage covering OU's Bizzell Library was retrieved (information was received that Hinrichs was at this library within an hour of the bombing) and review for Hinrichs was negative.

DNA samples from the deceased were forwarded to the FBIHQ Lab from the local Medical Examiner. DNA samples from Hinrichs' mother and father were sent directly to the FBIHQ Lab from Denver Division. FBIHQ Lab conducted nuclear and mitochondrial DNA tests and provided a final report to OCD. This report was provided to the local Medical Examiner who, on November 22, 2005, stated that his analysis indicated a positive identification of the deceased as Hinrichs. Appropriate family notifications were completed.

The local Medical Examiner's report did not indicate the presence of alcohol in Hinrichs' body. Minimal traces of decongestant, which could have come from cough medicine or allergy medicine, were present in the body.

b3

SOG  
OCD began 24/7 surveillance on [REDACTED] on October 2, 2005.

b6  
b7C

Dallas Division and Kansas City Division SOG teams arrived and assisted OCD's SOG team surveil [REDACTED] on October 3, 2005.

After consultations between OCD management and FBIHQ, OCD discontinued [REDACTED]

b6  
b7C  
b7E

#### LEGAL PROCESSES

During this investigation, 12 search warrants were obtained and executed, 11 FGJ subpoenas were obtained and issued, and eight [REDACTED] were obtained and served.

b7E

#### MISCELLANEOUS

Local media interest was significant and OCD's Media Representative coordinated appropriate press releases with the investigative team. [REDACTED]

b7E

CIRG's Behavioral Analysis Unit (BAU) was initially consulted and feels this incident was a suicide; Hinrichs may have meant to kill others but BAU does not feel this is a national security matter. BAU did not have official statistics concerning individuals who have committed suicide by IED.

OCD provided CTD [REDACTED] with images of Hinrichs' laptop hard drive, connected external hard drive, disconnected external hard drive, and loose media as requested by CTD.

b7E

OCD's command post was operational from October 2, 2005, until October 13, 2005. ICON was discontinued on October 27, 2005.

Disposition of all evidence is ongoing and has been documented to date.

This is to advise that all evidence retained by the laboratory has been destroyed per your EC request dated 2/13/06. The evidence was destroyed as follows:

1B13-1B18, 1B26-1B28, 1B34-1B39, 1B59, 1B89, 1B90 and DNA secondary- all items were dropped off at the biohazard waste disposal at the laboratory on 6/21/2006

1B81, 1B85-items were dropped off to chemical waste on 6/21/2006 you will receive an EC from [REDACTED] when waste is picked up

1B84, 1B86, 1B88- items were destroyed as part of EU training on range on 6/15/2006

1B75-1B78, 1B82-1B83, 1B96- items were disposed of on 7/18/2006

Please forward this to your evidence control room as well.  
If you have any questions feel free to contact me at [REDACTED]

Subject: Hinrichs Evidence

All -

I appreciate everyone's help on trying to get this evidence taken care of. The case has been basically closed since 2/2006 but has been pending inactive due to evidence matters since then. Officially closing this case is long overdue, so here's the status of the evidence and a list of what needs to happen.

STATUS:

The Lab's [redacted] has taken care of the evidence at the Lab as per the attached email. She has written an EC documenting what is in the attached email, but that has not been uploaded yet. Once it is uploaded, the proper disposition of the evidence can be documented in ACS

b6  
b7C

OCD's ECT [redacted] has taken care of the evidence in OCD as per the below email text.

Besides the evidence from the Lab that has been destroyed but not officially noted as such in ACS because [redacted] EC has not been uploaded, the only outstanding items that need attention (as I understand) are 1B93 and 1B113.

1B93 consists of three DNA samples from Hinrich [redacted]. This evidence was collected in Denver Division, put in storage on 10/5/2005 by [redacted] and logged in at the Laboratory on 10/17/2005 for DNA testing.

b6  
b7C

1B113 is a copy of the digital/computer evidence that OCD sent to DG [redacted]. It was sent to DG on 1/23/2006 by [redacted] and put into storage on 1/23/2006 by [redacted]. This is not truly evidence, rather it is a copy of the digital/computer evidence that was placed on one hard drive and sent to [redacted] as requested by [redacted] (request was made via email to writer by SSA [redacted] on 12/28/2005). [redacted] discusses 1B113. The ACTUAL digital/computer evidence has either been returned or destroyed - 1B113 is merely a copy of this evidence. Serial 441 discusses the status of 1B113, but there is a typo in the serial and 1B113 is mentioned in the serial as 1B112 (FYI 1B112 was an Oklahoma University computer returned by SA [redacted] on 11/2/2005 and documented in serial 347).

b6  
b7C  
b7E

WHAT NEEDS TO HAPPEN:

1. [redacted] please get your EC through the proper channels so it can be uploaded soon. Once this is done, [redacted] can properly annotate the evidence disposition in ACS.
2. [redacted] - please see if 1B93 has been destroyed or if it still remains at the Lab. If it remains, please destroy it and coordinate with [redacted] and Denver's ECC so we can get this item properly annotated in ACS as being destroyed.
3. [redacted] please contact [redacted] at FBIHQ and determine the status of 1B113 and what needs to be done with it. Coordinate with OCD CART as necessary.
4. Once items 1 - 3 happen, we can have [redacted] officially close this case.

b6  
b7C  
b7E

Just wanted to give you an update

All bio hazard evidence has been destroyed as of 10/25/06. The only evidence that remains is the explosives from the lab

1b93 that Denver collected and sent to the lab. (You probably need to contact the lab and have them destroy the evidence and then have Denver disposition it in ACS)

1b113 a hard drive that we sent to the lab.

Any questions give me a call.
